

CPDA DIRECT DRIVE

TCPDA direct driven reciprocating air compressor is a must have unit that everyone should have in their workshop. Great for nailing, wrenching, and other tasks. This 2.5hp Chicago Pneumatic air compressor on a robust 24 or 50 litre tank is perfect for your home workshop.

Most compressors on the market are 8 bar. This 10 bar compressor gives you higher impact and more flexibility in use, making this compressor perfect for your professional workshop. Weighing in at 37 kg, this single phase, oil lubricated compressor is lightweight and easy to move around.

KEY BENEFITS
