

SF302 Cast Iron

SF302 is cast iron 3-cylinder piston compressor. It's built for continuous duty in a professional workshop. If you are after an intermittent use compressor, we recommend a two cylinder compressor or compressors with aluminium pumps.

A 3-cylinder pump means that the compressor runs at lower rpm; resulting in reduced wear and a longer lifetime. This compressor has a Condor pressure switch, which is covered by a 2 year warranty.

KEY BENEFITS

01 Tough 3-cylinder cast iron pump

16 cfm from single phase 3HP

02 Low speed pump designed to last longer

Compact with 100 L air receiver

03 Continuous run mode

Specifications

Pump displacement

16 cfm

Motor size

3hp (2.2kW)

Tank size

50 or 100 litre

Maximum pressure

8 bar

Noise level

93 dB(A)
