

CPBA 3HP BELT DRIVE

CPBA-3100 Chicago Pneumatic air compressor is perfect for your professional workshop. If you want a top quality, 'does it all' air compressor for your automotive or small business, this single phase piston compressor is calling your name. This air compressor can support demanding tasks ranging from ratcheting, small hammering, wrenching, and spray painting!

This belt driven, 3hp, 10 bar compressor is on a 50 or 100 litre tank and is reliable and user-friendly. Built with an aluminium pump, and featuring a dual air outlet, oil level indicator, and strong wheels with brakes. The legs and wheels are widely positioned, which will prevent this compressor from tipping over.
