

Compressed Air & Vacuum

Company Profile

**People.
Passion.
Performance.**

**Efficiency and innovation for your business
since 1979.**

Our people are our strength.

The team at Ash Air are passionate about your business performance and success, with more than fifty qualified engineers working throughout the country providing unsurpassed compressed air solutions.

Our team of engineers are ready to support the continuity of your business 24/7, supporting all aspects of your compressed air and vacuum systems, with second-to-none service for all brands.

Ash Air started out as a hire company in 1979. By mid 1980's we were building oil flooded screw compressors for the New Zealand market. Through organic and acquisition growth, we soon became the largest company in New Zealand specialised in the compressed air and vacuum service and supply industry. Ash Air now comprises of 13 locations nationwide with over 115 staff and hundreds of years of combined experience.

"We are committed to being the easiest company to deal with in the air compressor and vacuum industry"

Ash Air offers Smart Services with Quality, Reliability, Speed, and Value to our customers.

Installation & Servicing

We sell, install, and service air compressors, vacuum pumps, and medical gas equipment. We also build pipe-work systems and make sure that your compressor room is suitable for the compressors to work well.

Preventative Maintenance

Regular maintenance on your air compressors ensures that they perform at their best; extending the life of the machines and reduces the risk of breakdown. The parts that need to be serviced regularly are such as air filters, oil filters, oil, and belts.

Repair & Overhaul

Wherever you are when you have a breakdown, our call-out engineer will be there to support you 24/7. We can repair, overhaul and rebuild your air compressors and vacuum pumps, no matter what brand they are.

Leak Detection & Energy Audits

With our advanced tools for leak detection and data-logging we can detect leaks and analyse your energy consumption. We'll provide you with an easy-to-understand report, recommend the right solution for your system, and save you money.

Rental & Emergency Air

Ash Air has a fleet of modern rental equipment to get you out of your compressed air and vacuum pump crisis. We offer modern portable diesel compressors, pumps, blowers, generators, light towers for hire across New Zealand.

We are passionate about understanding our customers and we have helped them save costs on their compressed air and vacuum systems.

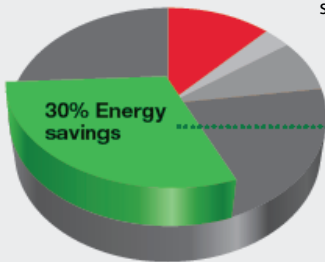

We're a proud official supplier of Emirates Team New Zealand

"An Ash Air compressor provides compressed air to the whole of the Emirates Team New Zealand base. Creating easy to use connections for a range of applications. Ash Air provide maintenance and servicing of Emirates Team New Zealand's compressor and vacuum pump throughout the course of the campaign."

- Tom Waterhouse, Manager
Official Suppliers, Emirates Team
New Zealand

Energy Efficiency

- 12% investment
- 3% installation
- 8% Service
- 77% Energy consumption

Variable Speed Drive (VSD) compressors can save up to 35% of system energy costs.

- Air demand
- Variable frequency driven costs
- Load Unload costs
- Savings

ICONS

ICONS stands for Intelligent Connectivity System which will give you the performance data of your machine. You will be able to optimise the efficiency and monitor your compressor from your desk.

Our passion for energy efficiency and cost saving derives from the concern for our children's future. Our products and services are both friendly to the earth as well as your business well-being.

What our customers say

"Ash Air has been pivotal in assisting Air New Zealand Engineering in our energy saving efforts. They provide us with constant improvement programs that include high quality equipment & service, Air Quality Testing, Leak Detection & Repairs and point of use improvements. Ash Air has always been there to support our compressed air efficiency requirements."

- Harvey Roberts, Senior Facilities Manager Property & Infrastructure
Auckland Jet Base, Air New Zealand Engineering

"At Fisher & Paykel Appliances, compressed air and vacuum systems are an important part of our operations. Ash Air understand our needs, solved our problems swiftly, and maintained our systems to a high standard. Ash Air's service has been reliable and professional."

- Shane Farrington, Engineering Manager,
Fisher & Paykel Appliances

Energy Saving Solution

- 7,900 serviceable units
- 30.6km AIRnet piping installed
- 3580 kW combined power of VSD compressors installed
- 2.1 MWh potential yearly energy savings identified through leak detection
- 3.5 MWh saved with AIRnet and VSD each year
- 2.2 Mton CO₂ emissions eliminated each year

Your business performance is what we strive for.

Ash Air offers a full range of Chicago Pneumatic and Alup air compressors, tools and on-site solutions. We provide oil-free compressors and food-grade oil to suit your needs. Ash Air are specialists in vacuum pumps, blowers, and medical gas solutions.

Ash Air offers complete quality air solutions as well as advanced piping systems for the performance and efficiency of your compressed air system.
