CPBA-55E PETROL

The Chicago Pneumatic 5.5HP petrol air compressor is designed to handle even the most demanding work conditions. This twin tank compressor features a Honda GX 160 4-Stroke, recoil start engine to deliver professional contractors the power they need.

Wheelbarrow design with a larger pneumatic wheel for ease of transport and stability. The solid rubberised feet and heavy duty roll bar protection add to the robust and portable nature of this air compressor, preventing the compressor from walking from excess vibration.

KEY BENEFITS

- 01 Powerful Honda GX 160 4-Stroke**
deliver professional contractors the power they need.
- 02 Tough applications**
ideal for all terrain, back of the ute or truck, farm jobs, fencing, work sites
- 03 Belt driven 2 cylinder pump**
with idle control which reduces pump and motor RPM when tank pressure reaches set cutout

Specifications

Pump displacement	12.4 cfm
Motor size	5.5hp (4.8kW)
Tank size	15 litre tanks (twin)
Maximum pressure	10 bar
Noise level	99 dB(A)

CPDA DIRECT DRIVE

afterpay

CPDA direct driven reciprocating air compressor is a must have unit that everyone should have in their workshop. Great for nailing, wrenching, and other tasks. This 2.5hp Chicago Pneumatic air compressor on a robust 24 or 50 litre tank is perfect for your home workshop.

Most compressors on the market are 8 bar. This 10 bar compressor gives you higher impact and more flexibility in use, making this compressor perfect for your professional workshop. Weighing in at 37 kg, this single phase, oil lubricated compressor is lightweight and easy to move around.

KEY BENEFITS

- 01 Convenient 1 phase/10 amp plug**
Easy to move around with strong wheels
- 02 Easy to use**
Great for nailing, wrenching, and other home workshop or DIY tasks.
- 03 Service kit option**
to prolong the lifetime of your compressor

Specifications

Pump displacement	9.5 cfm
Motor size	2.5hp (1.8kW)
Tank size	24 or 50 litre tank
Maximum pressure	10 bar
Noise level	95 dB(A)
Weight	24 37 kg

CPBA-2550 BELT DRIVE

CPBA-2550 Chicago Pneumatic air compressor can support tasks ranging from ratcheting and small hammering to painting and wrenching. If you want a top quality, 'does it all' air compressor for your automotive or small business, this Chicago Pneumatic piston compressor is the go.

This belt driven, 10 bar compressor is on a 50 litre tank and is reliable and user-friendly. This air compressor is reliable and user-friendly, built with slow speed aluminium pump and features such integrated pressure regulator, oil-level indicator, strong wheels, and runs from a 10 amp plug.

KEY BENEFITS

01

Reliable Aluminium pump

Easy to move around with strong wheels

02

Double Outlets

And runs from 10 amp plug

03

Service kit option

to prolong the lifetime of your compressor

Specifications

Pump displacement

8.7 cfm

Motor size

2.5hp (1.8kW)

Tank size

50 litre tank

Maximum pressure

10 bar

Noise level

93 dB(A)

Weight

58 kg

CPBA 3HP BELT DRIVE

afterpay

CPBA-3100 Chicago Pneumatic air compressor is perfect for your professional workshop. If you want a top quality, ‘does it all’ air compressor for your automotive or small business, this single phase piston compressor is calling your name. This air compressor can support demanding tasks ranging from ratcheting, small hammering, wrenching, and spray painting!

This belt driven, 3hp, 10 bar compressor is on a 50 or 100 litre tank and is reliable and user-friendly. Built with an aluminium pump, and featuring a dual air outlet, oil level indicator, and strong wheels with brakes. The legs and wheels are widely positioned, which will prevent this compressor from tipping over.

KEY BENEFITS

- 01 Reliable Aluminium pump**
Easy to move around with strong wheels
- 02 Easy to use**
Great for nailing, small hammering to spray painting, and other home workshop or DIY tasks.
- 03 Service kit option**
to prolong the lifetime of your compressor

Specifications

Pump displacement	13 cfm
Motor size	3hp (2.2kW)
Tank size	50 or 100 litre tank
Maximum pressure	10 bar
Noise level	93 dB(A)
Weight	64 81 kg

CPBC CAST IRON

afterpay

CPBC-3100 Chicago Pneumatic 'Ironman' cast iron piston compressor. Low rpm, contributing to a longer life time and highly efficient, with more cfm per hp. This compressor comes with a condor pressure switch, adding to the reliability of these machines.

Slow turning, long lifetime cast iron pumps with two years warranty, providing strong performance. Optimal cooling is guaranteed by using cylinder heads with deep cooling fins, a cast iron flywheel and a strong copper outlet pipe. The large oil sight glass makes it easy to check the oil level.

KEY BENEFITS

- 01 Low rpm for a long lifetime**
High efficiency means more cfm per HP
- 02 Strong and robust**
Full range of specially selected cast iron pumps. High-quality components.
- 03 Efficiency**
MEPS compliant, highly efficient IP55 motor with copper windings guarantees reliable protection from dust, oil and water.

Specifications

Pump displacement	14.13 cfm
Motor size	3hp (2.2kW)
Tank size	100 litre tank
Maximum pressure	10 bar
Noise level	73 dB(A)
Weight	93 kg

CPRB 6 OIL FREE

CPRB 6 Vento Start is a perfect compressor for home use and interior work. This Chicago Pneumatic oil free piston compressor is ideal for floor carpeting, blowing away dust, inflating tyres, small brad/staple guns and doing small air tool work. Tuck it away in the garage, and bring it out when you need it for carpeting and interior applications.

Well designed, and truly handy for your everyday compressed air demands, weighing in at 9.5kg. This 1.5hp, 6 litre tank piston compressor can easily be picked up, transported in your car or ute.

KEY BENEFITS

- 01 Oil free**
Minimize risks of oil-spilling are suitable for fibre blowing tasks
- 02 Lightweight**
9.5 kg easy to move around
- 03 Applications**
Good for carpeting & interior work

afterpay

Specifications	
Pump displacement	6.4 cfm
Motor size	1.5hp (1 kW)
Tank size	6 litre tank
Maximum pressure	8 bar
Noise level	90 dB(A)
Weight	9.5 kg

1.5HP OIL LESS

This oil-free air compressor works very quietly, making it suitable for applications that require quiet working environment. The compressor has a dynamic balance design, meanwhile rubber cushions and rubber feet was also contributing to limit its vibration to low level. There is no lubricating oil in the piston and cylinder creating pure air quality. Key parts such as tank, safety valve, pressure switch etc which makes the machine work safely and reliably, meanwhile it is very easy to use machine.

This compressor runs off a 10 amp plug and delivers high efficiency and low energy consumption due to better design. The cylinders with diamond hardness make sure it is more durable and superior to other air compressors, and the machine is very easy and low costs to maintain.

KEY BENEFITS

- 01 Oil free**
Minimize risks of oil-spilling
- 02 Super quiet**
Complete with water trap and regulator
- 03 Applications**
Reliable and easy to use

Pump displacement	5 cfm
Motor size	1.5hp (1 kW)
Tank size	50 litre tank
Maximum pressure	8 bar

SF302 Cast Iron

SF302 is cast iron 3-cylinder piston compressor. It's built for continuous duty in a professional workshop. If you are after an intermittent use compressor, we recommend a two cylinder compressor or compressors with aluminium pumps.

A 3-cylinder pump means that the compressor runs at lower rpm; resulting in reduced wear and a longer lifetime. This compressor has a Condor pressure switch, which is covered by a 2 year warranty.

KEY BENEFITS

01 Tough 3-cylinder cast iron pump
16 cfm from single phase 3HP

02 Low speed pump designed to last longer
Compact with 100 L air receiver

03 Continuous run mode

SF302 KOHLER

Built with a 3-cylinder heavy duty cast iron pump and powered by a 6.5 HP Kohler petrol motor, the SF302 KOHLER 750 is a single stage belt drive slow revving high output portable air compressor suitable for various air tools such as impact wrenches, ratchets, drills, grinders and sanders.

If you are looking for a reliable and heavy duty portable air compressor, the SF302 KOHLER 750 is all you need.

KEY BENEFITS

- 01

Tough 3-cylinder cast iron pump
Low speed pump designed to reduce temperature
- 02

Powered by KOHLER 6.5 HP petrol motor
Finned tube Intercooler
- 03

Portable with 50 L air receiver
Easy oil check and refill

Specifications

Pump displacement	18 cfm
Motor size	6.5hp (4.8kW)
Tank size	50 litre
Maximum pressure	8 bar
Noise level	93 dB(A)
