People. Passion. Performance.

People

Our **people** are our strength. We are made up of more than 50 qualified engineers who are passionate about your business performance and success, ready to support the continuity of your business 24/7.

“ We are committed to be the **easiest** company to deal with in the air compressor and vacuum industry. ”

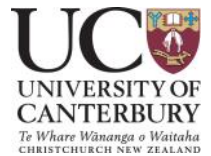

People. Passion. Performance.

People

We are passionate about understanding our **customers** and we have helped them save costs on their compressed air and vacuum systems. Today Ash Air is trusted by more than 1,000 businesses, large and small, all over New Zealand.

Ash Air has been pivotal in assisting **Air New Zealand Engineering** in our energy saving efforts. They provide us with constant improvement programs that include high quality equipment & service, Air Quality Testing, Leak Detection & Repairs and point of use improvements.

Air New Zealand Engineering do our best in servicing large jet airframes and Ash Air has always been there to support our compressed air efficiency requirements.

- Harvey Roberts, Senior Facilities Manager Property & Infrastructure
Auckland Jet Base, Air New Zealand Engineering

At **Fisher & Paykel Appliances**, compressed air and vacuum systems are an important part of our operations. Ash Air understands our needs and can solve our problems very swiftly. They have maintained our systems to a high standard. The service and support from Ash Air over the years has proven to be reliable, professional and genuine. They are highly skilled real people and we are happy to be working with them.

- Shane Farrington, Engineering Manager, Fisher & Paykel Appliances

People. Passion. Performance.

Passion

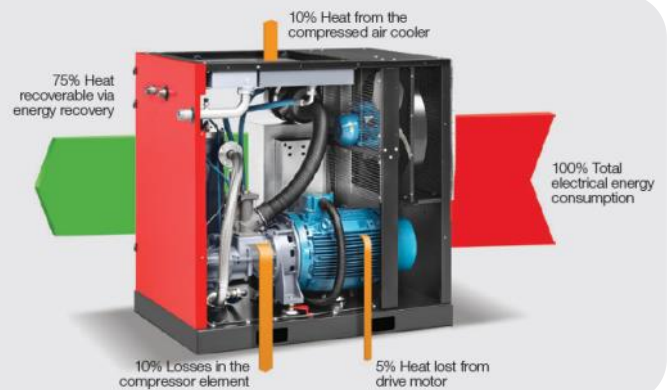

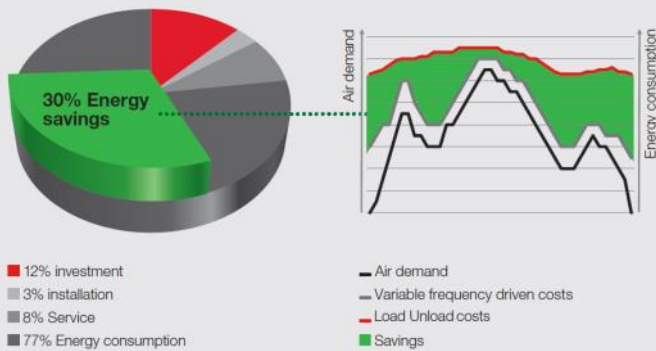

Our **passion** for **energy efficiency** and cost saving derives from the concern for our children's future. Our products and services are both friendly to the earth as well as your business well-being.

ENERGY EFFICIENCY

Variable Speed Drive (VSD) compressors can save up to **30%** of system energy costs.

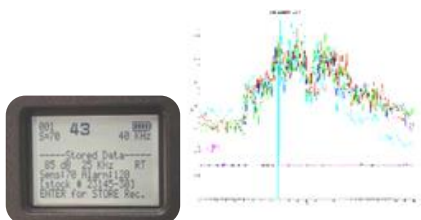

ENERGY RECOVERY

The **energy recovery option** can capture heat and recover up to **75%** of energy loss.

ENERGY AUDITS

Analysing the efficiency of your system is a brilliant way to start saving. Our certified technicians can analyse your system with leak detection equipment and data loggers and suggest the best solution for you.

ICONS

ICONS stands for Intelligent Connectivity System which will give you the performance data of your machine. You will be able to optimise the efficiency and monitor your compressor from your desk.

5-YR EXTENDED WARRANTY

Our 5-Year Extended Warranty covers all parts of your compressor. Scheduled services are done by qualified engineers using only original parts for maximum efficiency, minimum downtime, controlled budget.

People. Passion. Performance.

Performance

Your business **performance** is what we strive for. Ash Air offers a full range of **Chicago Pneumatic** and **Alup** air compressors, tools and on-site solutions, including food-grade oil and oil-free compressors to suit your specific needs.
